

I began using the SATPAC Program in the mid-1990s. I'll never forget the first time I started using the SATPAC Practice Phase lists. I was stunned and surprised by how many correct responses I was getting in a therapy session compared to what I was doing previously.

Now 25 years later, the SATPAC Program has evolved and so has my knowledge about how to use it most successfully to remediate our SSD students effectively and efficiently.

I want to share this information with you with special emphasis on the remediation process through live demonstrations (when possible), case studies that I have had and case studies that you can present where we all problem solve together.

I'm excited about this workshop because in my workshops with mostly new SATPAC users, I feel like I never have enough time to go over the case studies and have the participants use the program. In this workshop, most of the afternoon will be devoted to the case studies.

Another reason I'm looking forward to the workshop is that people who have used the program like yourselves, will have questions based upon your experiences that people without that experience would not be able to ask.

So let's explore together how to best remediate SSDs using the SATPAC Program!

A handwritten signature in blue ink that reads "Stephen Sachs". The signature is written in a cursive, flowing style.
